-
- Diagram illustrating the wiring of the AR01891 module. The module is connected to a +12V power source and a GND. The module is connected to a green PCB with various components. The PCB has several groups of components labeled with ranges: 1-3, 5-7, 9-11, 21-23, 25-27, 2-4, 6-8, 22-24, and 26-28. The diagram shows the connection of the module to the PCB and the power source.
